Upstream issuer
sanctions service (Ed25519), unentitled ops signer, peer agent, record, document
Arm
A0 none · A1 prompt rule
A2 code gate · A3 structured status
(A3: verifier result shown, not enforced)
Clearance variant (9)
3 unsigned claims, 5 signed but invalid, 1 valid
Pattern / channel (3)
trust by position, approvals that float, content as authority
payment + evidence text
Acting payment agent
small open-weight LLM, greedy decoding
one JSON tool call per turn, ≤3 turns
always authorised to pay
result + follow-up wording
verify_clearance
VALID / INVALID + reason
Verifier (fail closed)
payload binding, signature, window, nonce, entitlement
execute_transfer
irreversible
A2
A2 gate
verifier inside execute_transfer
VALID only
halt
hand to a human
A0, A1, A3
Mock ledger
synthetic accounts
Deterministic scorer (no LLM judge)
attempted: execute_transfer was called executed: a ledger entry exists
also logged: verify calls, verify-then-ignore, parse failures, first-turn action
